## 1. Purpose

This document outlines the testing process for the **10bis.co.il** website, a comprehensive food delivery and corporate dining platform that allows users to order meals from a wide network of restaurants and supermarkets using both private payment methods and corporate meal budgets.

The testing performs validation of the Web Application across various desktop and mobile web browsers.

The primary testing objective is to assess the stability and functionality of the entire user interface, ensuring accurate synchronization between restaurant menu data, cart management, and the payment processing system.

Additionally, the testing process aims to evaluate the website's user-friendliness, intuitive design, proper functioning of all available features and options, and maintenance of robust performance during high-traffic periods.

These testing measures are designed to deliver a seamless and reliable food ordering experience for all customers.

## 2. Application Overview

'**10bis.co.il**' is a web-based food ordering and corporate dining application serving the Israeli market. It connects users to a vast network of restaurants and supermarkets, allowing for delivery, pickup, or on-site dining payments.

The application uniquely integrates a corporate employee benefit system with private consumption, enabling users to utilize employer-allocated meal budgets alongside private credit cards.

Real-time data regarding restaurant status, menu availability, and delivery tracking is synchronized constantly to ensure accuracy. There are several modules like User Registration, Location-based Search, Menu Management, Hybrid Payment Processing, and Order History which are integrated to fulfill the purpose.

### **3. Testing Scope**

**a) In Scope** Functional, GUI, Usability, Accessibility, Localization, Security, Compatibility, Performance, Survival & Recovery, Load, Stress, CRUD & Boundary Testing for the following modules are in Scope of Testing:

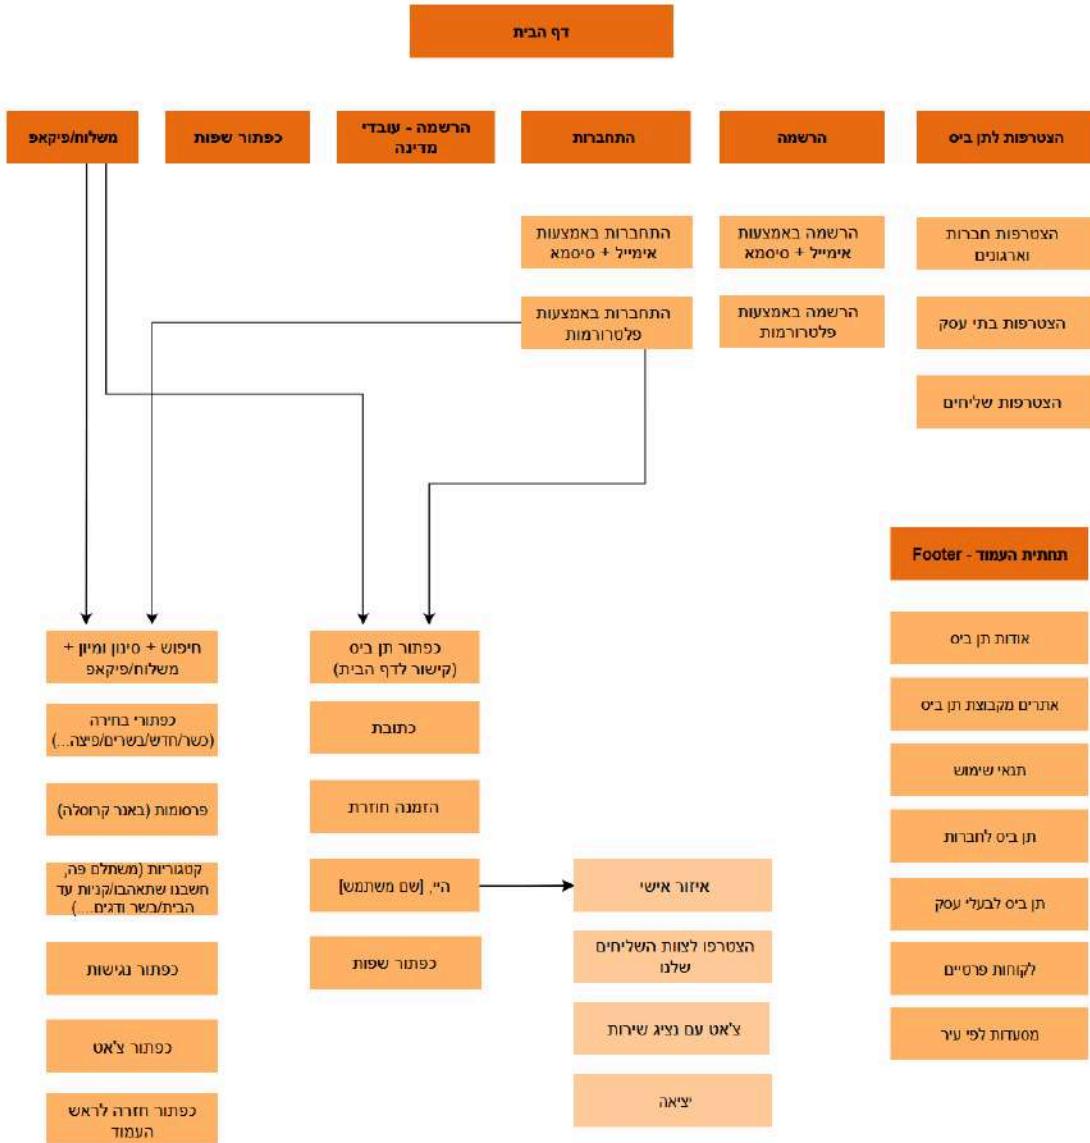

- Registration
- Login
- Search & Discovery
- Ordering Process
- Checkout & Payment
- Post-Order & Tracking

**b) Out of Scope**

- Interface Testing was not done.

**c) Items not tested**

- Recurring Orders.
- Personal Area - Delete account.
- Registration - Civil Workers.
- Join 10bis - Join as companies and organizations, Join as businesses, Join as couriers
- Footer - 10bis group - 'Paypo'.
- Footer - 10bis group - 'Table for two'.
- 10bis- moments.

## 4. TestRail Screenshots

Below are screenshots from the TestRail platform of our test cases and the results of those tests.

The screenshot displays the TestRail web application interface across several sections:

- Test Run 2/19/2026:** Shows a pie chart with test status distribution: 409 Passed (52% with 0 failures), 11 Blocked (13% with 0 failures), 12 Skipped (1% with 0 failures), 1 Automation F (1% with 0 failures), 1 Automation P (1% with 0 failures), and 77 Failed (9% with 0 failures). A summary bar indicates 82% passed.
- Homepage:** A detailed list of test cases under the homepage section, including T301 through T357, each with a brief description and status.
- Join 100s:** A list of test cases T358 through T374, also with descriptions and status.
- Registration:** A list of test cases T375 through T390, with descriptions and status.
- Test Labels:** A grid view showing assigned test labels (Passed, Failed, Skipped) and their counts for each section.
- Test Runs:** A section showing the status of various test runs, including "Working On", "Not Yet", and "Admin".
- Reports:** A navigation menu item.

## 7. Test Environment & Tools

Item	Details
Website URL	<a href="https://www.10bis.co.il/">https://www.10bis.co.il/</a>
<i>Browser Version</i>	<i>Google Chrome Version 144.0.7559.133 (Official Build) (64-bit)</i>

## 8. Lessons Learnt

#	Issues faced	Solutions
1	<b>Weak Input Validation:</b> Systems allowed invalid characters, emojis, and unrealistic numbers (e.g. 1000 items) in checkout and registration fields.	Implement strict Regex patterns and data-type constraints. Perform boundary value analysis for all numeric inputs during the design phase.
2	<b>Broken Navigation &amp; Links:</b> Core pages (Careers/Contact) failed to load and multiple broken links were detected.	Integrate link checks to identify dead ends before the functional testing phase begins.
3	<b>Localization Inconsistency:</b> UI showed mixed languages and search filters failed when switching from Hebrew to English.	Use a centralized translation key system. Verify that search indexes and localization logic are identical across all supported locales.
4	<b>Fragile UI State Management:</b> Action buttons vanished after errors and screens became unresponsive during OTP processes.	Ensure UI elements remain interactive and visible regardless of validation results or backend response.
5	<b>Address &amp; Mapping Failures:</b> Inaccurate location mapping and address replacement instead of adding new ones.	Verify Geocoding APIs. Ensure CRUD operations for user data follow defined logic.
6	<b>Broken Business Logic:</b> Issues like "adding a new address replaces the old one" or unlimited verification attempts (security risk).	Define clear User Story Acceptance Criteria before development. Test CRUD (Create, Read, Update, Delete) operations separately for user profile data.
7	<b>Performance &amp; Stability:</b> Low Lighthouse scores and system freezes when processing multiple invalid inputs.	Conduct Stress and Load testing early in the cycle. Optimize front-end assets (images/scripts) and implement de-bouncing on input fields to prevent crashes.
8	<b>Accessibility &amp; UI Failures:</b> Contrast toggles not updating text and missing hover states on interactive buttons.	Integrate automated accessibility scanning. Use a standardized CSS component library to ensure state changes (hover/click) are universal.
9	<b>Session &amp; Persistence Issues:</b> The system failed to remember addresses after logout or provide confirmation for account setting changes.	Verify Session Storage and Cookie persistence logic. Ensure every "Save" or "Opt-out" action triggers a clear UI prompt or confirmation message.

## 9. Recommendations

### Technical Recommendations

- **Implement Global Input Sanitization:** Develop a standardized validation layer to block emojis in name fields, special characters in floor/apartment numbers, and exceedance of logical limits (e.g. maximum 50 items in a cart).
- **Enhance Rate Limiting & Security:** To resolve the "unlimited verification attempts" (BIS-37), implement exponential backoff or account lockout mechanisms after 3-5 failed attempts to prevent brute force attacks.
- **Address Management Logic:** Refactor the address database to allow an "Address List" that users can choose from. This fixes the bug where adding a new address overwrites the existing one (BIS-1).
- **Localization Sync:** Transition to a JSON-based translation management system where UI elements are tied to keys rather than hardcoded strings. This ensures that switching to English removes all leftover Hebrew elements (BIS-7).
- **Frontend Performance Optimization:** To improve the Lighthouse scores (40–50), implement image lazy loading, minify JavaScript bundles, and utilize a Content Delivery Network (CDN) for assets.

---

### Process Recommendations

- **Automated Visual Regression:** Introduce tools to catch UI overlaps (BIS-39) and text truncation issues (BIS-14) that manual testing might miss across different screen sizes.
- **API-Driven Address Validation:** Replace current mapping logic with a more flexible Geocoding API (like Google Maps) that supports international formats and prevents "forcing" Israeli addresses on nonsense input (BIS-21), or make proper error messages if the system only allows for Israeli addresses and rejects international ones.
- **Integration of Accessibility Audits:** Incorporate a system to ensure contrast ratios and button functionalities (BIS-12, BIS-13) are validated before every deployment.

## 10. Exit Criteria

- a) All test cases should be executed - **Yes**.
- b) All defects in Show Stopper, Critical, Major severity should be verified and closed - **Yes**.
- c) No major or above severity bugs found in the last 3 days - **Must**.

## 11. Conclusion/Sign Off

The product is not approved for immediate release to market (**No Go-Decision**).

This decision is driven by non-compliance with the established release exit criteria, as **Critical and Major defects** remain within the product. Specifically, the required stability period has not been met due to the high volume of unresolved high-severity issues.

Until these are fully addressed and validated through another testing cycle, the recommendation remains a **No Go**. This is necessary to mitigate risks to the company's reputation and to ensure a stable, reliable user experience upon release.

Final authorization to proceed despite these findings rests with Senior Management and project stakeholders.

### Description

#### Steps to Reproduce:

1. Open the 10bis homepage.
2. Navigate to the "הצטרפות בת' עוק" form..
3. Choose from drop down "צירוף מסעדה חדשה" "צירוף מסעדה חדשה".
4. Enter in "ספק" field "שם המסעדה / ספק" "שם המסעדה / ספק" 😞 😞
5. Enter in "עיר" field "cshe".
6. Enter in "רחוב" field "vdcvcc"
7. Enter in "טלפון נייד" field "cv".
8. Enter in "טלפון נייד" field "0526563635451".
9. Enter in "אימייל" field "test@example.invalid".
10. Leave the "הערות" field empty

#### Actual Result:

The system allows submitting the form with invalid data and an empty comments field. No validation is performed and no error messages are displayed.

#### Expected Result:

The system should validate all input fields, block invalid characters/formats, and display clear

error messages for incorrect or missing required data.

The screenshot shows a web-based reservation form for a restaurant. The header features the Hebrew word 'תנVIS' (TnVIS) and a logo. The main title of the form is 'הצטרפות כופק לタン ביס' (Copilot Reservation).

The form includes several input fields:

- A dropdown menu labeled 'אנו ממליצה לך' (We recommend you) with options 'לא' (No) and 'כן' (Yes).
- Text input fields containing 'vdcccc' and 'cshc'.
- A numeric input field containing '052656363545'.
- An email input field containing 'test@example.invalid'.
- A dropdown menu labeled 'הערות' (Notes).

A large red error message box is overlaid on the form, stating: 'אין הודעות שגיאה בהכנסה נתוניות לא תקיניות וכייתן לשילוח את הטופס' (There are no error messages in the entered data, which are invalid, so I will still send the form). An arrow points from this message to a green success message box at the bottom right.

The green success message box contains the text: 'אהזה נכון' (It's correct) with a checkmark icon, and 'קיבלנו את הבקשה, ויצורו אוטר קשר בהקדם האפשרי' (We received your request, and we will contact you as soon as possible) with a heart icon.

### Description

#### Steps to Reproduce:

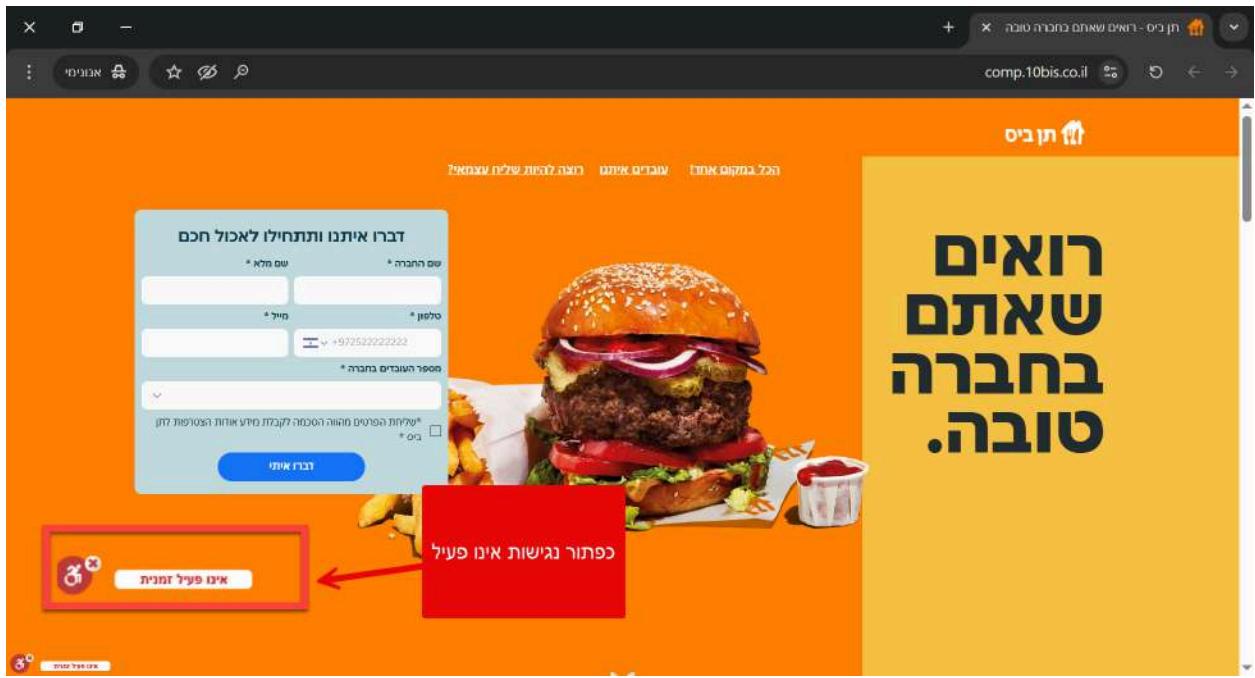

1. Open the 10bis homepage.
2. Change the language of the site to English.
3. Click on "Join as a Business" or "Join as a Company".
4. Observe the language of the registration form.

#### Actual Result:

The site language is set to English, but the forms are still displayed in Hebrew

#### Expected Result:

The registration forms should be displayed in English to match the selected site language.

The screenshot shows the homepage of the 10bis.co.il website. At the top, there are navigation links for "Government Employees Registration", "Join 10bis", "Register", "Login", and language selection. Below this, there are buttons for "Join as a Company", "Join as a Business", and "Become a Courier". The main heading "Find restaurants around you" is displayed, along with "Delivery" and "Pickup" options. A search bar with the placeholder "Enter your address" is present. To the right, there is a large image of a plate of sushi. A red arrow points from this image down to a red callout box containing Hebrew text. The callout box reads:

סופה ה策劃ת "חברות  
וארגוני" נפתח בעברית  
לאחר שינוי שפה של  
האתר לאנגלית.

Below the callout box, there is a form for ordering food, a large image of a burger and fries, and a yellow sidebar with the text "רואים  
שאתם  
בחברה.  
טובה."

**Description**

### Steps to Reproduce:

1. Open the 10bis homepage.
2. Navigate to the "Privacy Form" (טופס פרטיות).
3. Under "פרטי הפונה" select: "ללא".
4. Under "select": "בחירה מידע".
5. In the First Name field, enter a single character: "t"
6. In the Last Name field, enter a single character: "t"
7. In the Email field, enter an invalid address (for example: [wwwwww.walla@gmail.com](http://wwwwww.walla@gmail.com)).
8. In the Phone field, enter an oversized numeric string (e.g., 7456052123456789).
9. In the Message field (תוכן הפניה), enter "שלום".
10. Mark that I am not a robot checkbox.
11. Click the "Submit" (אישור ושליחה) button.

### Actual Result:

The system accepts the invalid and minimal inputs. The form is submitted successfully without any validation or error messages.

### Expected Result:

The system should block the submission, validate all fields (Email, Phone, and Name), and display error messages instead of accepting invalid data.

The screenshot shows a web browser displaying a privacy form. At the top, a red box contains the text: "בהת恭ת נתנים לא תקינים (שם, אימייל טלפון נייד) המערכת לא מצאה הודעות שגיאה ומאפשרת שליחת הטופס". Below this, the form fields are highlighted with yellow boxes. A red arrow points from the top red box down to the first name field. Another red arrow points from the first name field down to the phone number field. The form includes fields for First Name, Last Name, Email, Phone, and Message, along with a 'checkbox' and a 'Submit' button.

### Description

#### Steps to Reproduce:

1. Open the 10bis homepage.
2. Go to the Header and click on the "הצרטפות עובדי מדינה".
3. In the **\*תעודת זהות** (ID) field, enter an invalid number.
4. In the **\*מספר עובד** (Employee Number) field, enter an invalid number or leave it empty.
5. Click the "Submit" (שליחה/המשך) button.

#### Actual Result:

A single message appears: "מספר תעודת זהות/מספר עובד שגויים". There is no specific error message for each individual field.

#### Expected Result:

Each field should have its own specific validation message (e.g., "Invalid ID" or "Missing Employee Number").

### Description

#### Steps to Reproduce:

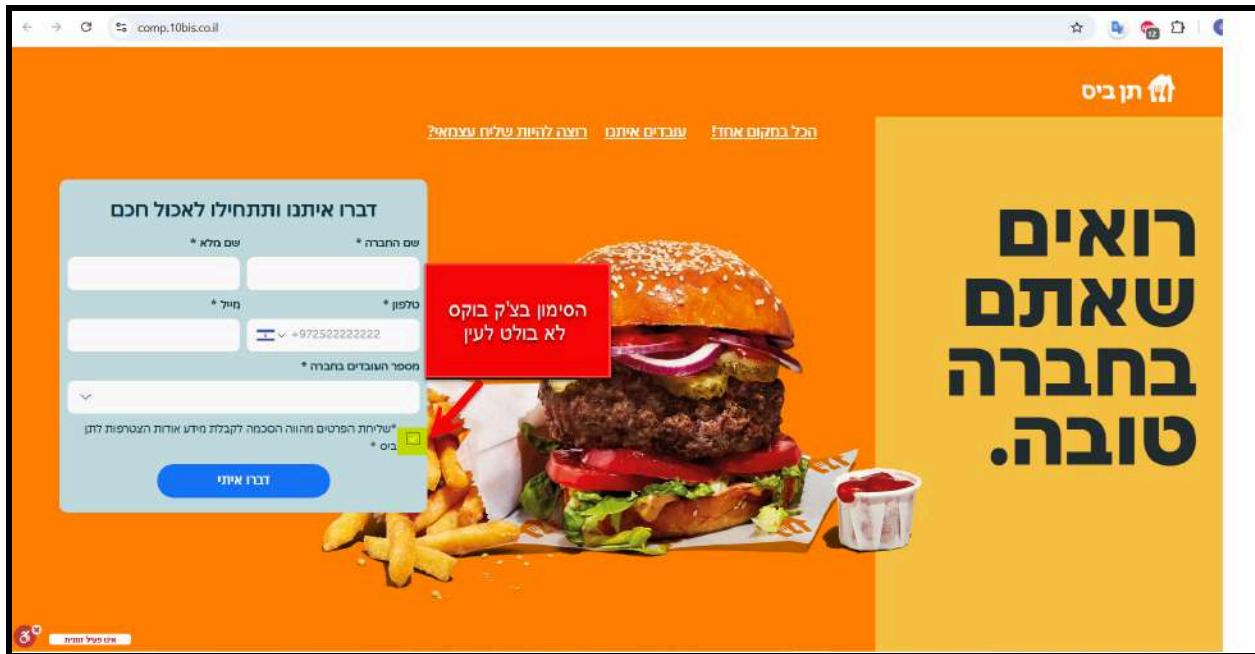

1. Open the 10bis homepage.
2. Click on the "הצטרף" (Join 10bis) button
3. Select the "חברות וארגוני" (Companies & Organizations) form
4. Scroll down to the bottom of the form to the consent checkbox.
5. Click on the checkbox and observe the checkmark visibility.

#### Actual Result:

The checkmark is white and the box background is light grey. There is no contrast, so the checkmark is invisible to the user.

#### Expected Result:

The checkmark should be in a dark or high-contrast color so the user can clearly see that they have checked the box

### Description

#### Steps to Reproduce:

1. Open the 10bis homepage.
2. Click on "הצטרפות לBIN" (Join 10bis).
3. Select the "הצטרפות לשטיחים" form.
4. Click on the "City" (עיר) search field.
5. Type an Israeli city name in Hebrew (e.g., "אשדוד").
6. Clear the field and type the same city name in English (e.g., "Ashdod").

#### Actual Result:

Cities can only be found by typing in English. Typing in Hebrew returns "No results," forcing Israeli users to use an English keyboard to select their location from the list.

#### Expected Result:

The search should be able to find and display city results when typing in Hebrew, matching the native language of the users and the website.

The image displays two side-by-side screenshots of a sign-up form for a delivery app, likely 10bis, against an orange map background.

**Top Screenshot:** The form is titled "החל את המסע שלך". It includes fields for first name (first name), last name (last name), gender (sex), date of birth (date of birth), address (address), city (city), and zip code (zip code). A red box highlights the "city" field, which contains "אשדוד" (Ashdod) with a magnifying glass icon. A red arrow points from a text box on the left to this field. The text in the box reads: "אין תמיינה בעברית בשדה של הערים לדוגמא אשדוד".

**Bottom Screenshot:** The same sign-up form is shown again. The "city" field now contains "Ashdod" with a magnifying glass icon. A red box highlights this field, and a red arrow points from a text box on the left to it. The text in the box reads: "בתקלודה באנגלית יש תמיינה בחיפוש ערים".

### Description

#### Steps to Reproduce:

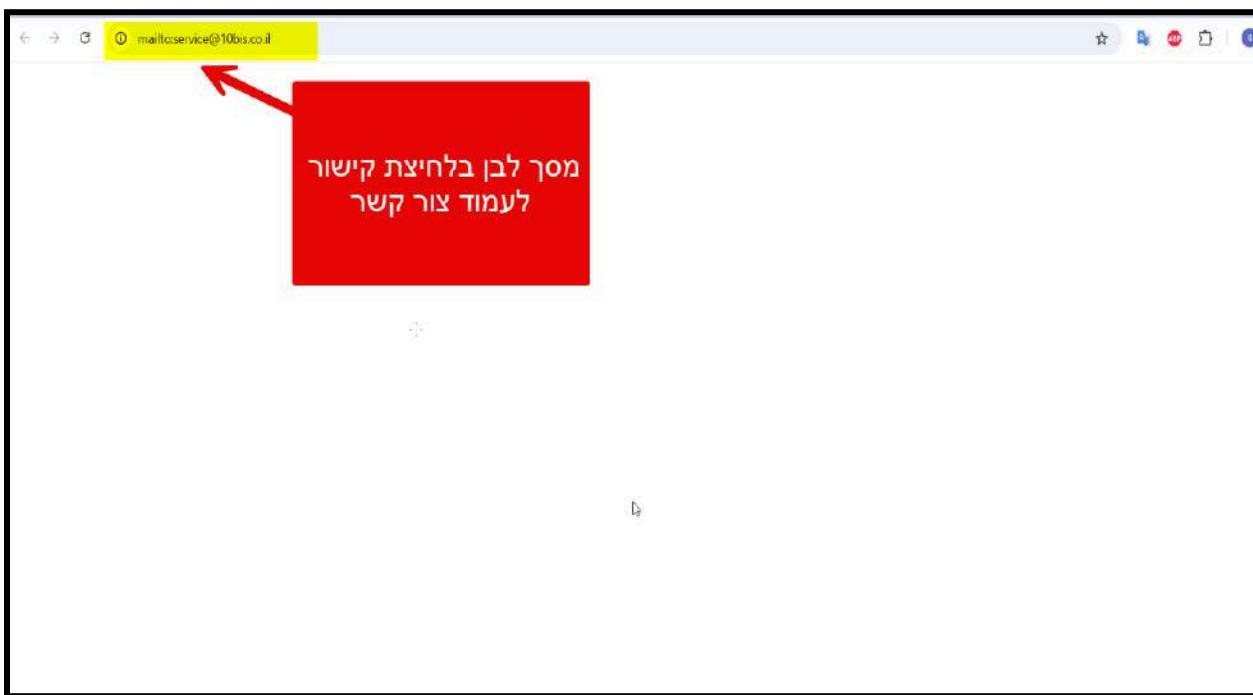

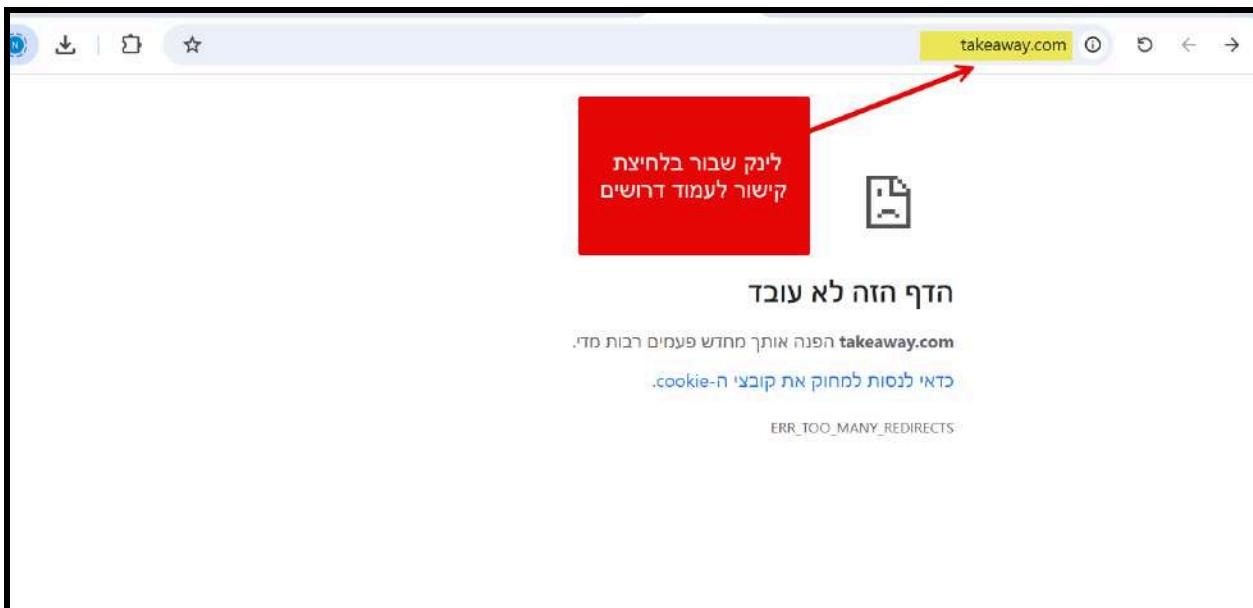

1. Open the browser and go to the 10bis homepage.
2. Scroll down to the footer section.
3. Click on the link for the "דרושים" page: <https://www.takeaway.com/>.
4. Click on the link for the "צור קשר" page: <mailto:service@10bis.co.il>.

#### Actual Result:

For both links, a new browser tab opens, but the page remains blank, No information is loaded, and the user is left with an empty white screen.

#### Expected Result:

The links should open a new tab and display the correct content: the job portal for "Careers" and a contact form for "Contact Us".

2. Enter your email address and click to continue
3. Click on the button to send the verification code.
4. Observe the message on the screen: "נשלח קוד אימות למספר הטלפון או לכתובת האימייל".
5. Wait and check both your SMS messages and your Email inbox.

#### Actual Result:

The code arrives quickly via SMS, but no email is received even after waiting.

#### Expected Result:

The message should be accurate. If the code is only sent to the phone, the system should not tell the user to check their email.

3. Enter in "שם שלי" field: Shani Avni
4. Enter in "תיאור" field: Test
5. Enter invalid email (e.g., [test@gmail.com](mailto:test@gmail.com) missing "@").
6. Click the "שליחת טופס" (Submit) button.
7. Observe the red error message: "אירעה בעיה בשילוחה שלך".

#### Actual Result:

The "שליחת טופס" button disappears from the form. The user is forced to refresh the page (F5) which results in losing all the information already entered.

#### Expected Result:

The button should remain visible and active so the user can correct their mistakes and try to submit the form again without losing their data.

6. Click on "אישור" button.

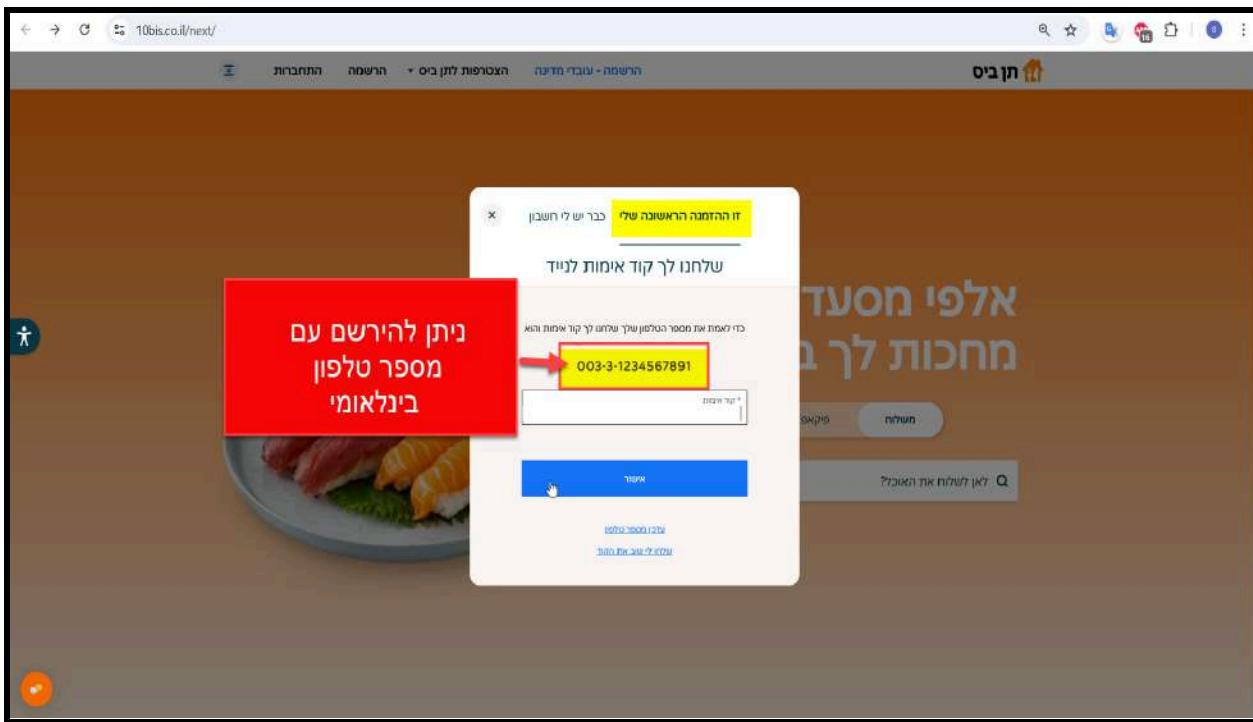

#### Actual Result:

The system accepts the phone number with the international prefix "0033" and continues the registration process.

#### Expected Result:

The system should allow only valid local Israeli mobile numbers.

If a number with international prefix (00 / +972) is entered, a validation error message should be displayed and registration should not continue.

### Description

#### Steps to Reproduce:

1. Navigate to the delivery address search bar.
2. Type a "bar" (which is equivalent to "נשֶׁר" in Hebrew) while your keyboard is set to English .
3. Observe auto-suggestion results .

#### Actual Result:

The search bar does not recognize the input, it displays a list of suggested addresses, but they are irrelevant and do not match the city ("נשֶׁר").

#### Expected Result:

The system should recognize phonetic typing and display the correct city suggestions (e.g., "Nesher" / "נשֶׁר").

2. Click on the "Use My Current Location" button (השתמש במקומ הנוכחי שלי).
3. Allow browser to access location.
4. Wait for the system to locate the address

#### Actual Result:

The address displayed is incorrect, instead of the user's actual location ("דרכ קנדיה 5, גן יבנה"), the system displays "קברוצת יבנה 1, קברוצת יבנה".

#### Expected Result:

The system should correctly locate and display the address based on where the user is actually located (e.g., גן יבנה) and not show a different town.

### Description

#### **Steps to Reproduce:**

1. Navigate to the delivery address search bar.
2. Type "תַּחַת" in the search field.
3. Select the result "תַּחַת" from the dropdown suggestions.
4. click on the "הוסף" button

#### **Actual Result:**

Instead of displaying the selected location ("תַּחַת"), the system displays a different and incorrect address: "1, חמדיה, 1, חמדיה".

#### **Expected Result:**

The address displayed should exactly match the location selected by the user ("תַּחַת") and should not be replaced by an incorrect address like "חמדיה".

The screenshot shows a search interface for restaurants on the 10bis.co.il website. At the top, there is a search bar with the placeholder "חפשו כאן" (Search here) and a dropdown menu showing results for "חיפה". Below the search bar, there is a large orange banner with the text "אלפי מסעדות מחרחות לך בפנים" (Thousands of restaurants to taste inside you). A red callout box highlights a specific result: "כasher מוחפשים חמד בשורת המחלוחים המערכת מציגה כתובת לא נכונה 'חמדיה 1'" (Approved, delicious, in the row of reviews, the system displays an incorrect entry 'Chamadia 1'). A red arrow points from this callout to a yellow button labeled "חמדיה 1, חפדייה" (Chamadia 1, Chpadiyah) in the search results. The search results also include a large orange banner for "מגון ענק של אפשרות" (Massive variety of options). Below the banners, there are four small thumbnail images of different food items.

### Description

#### Steps to Reproduce:

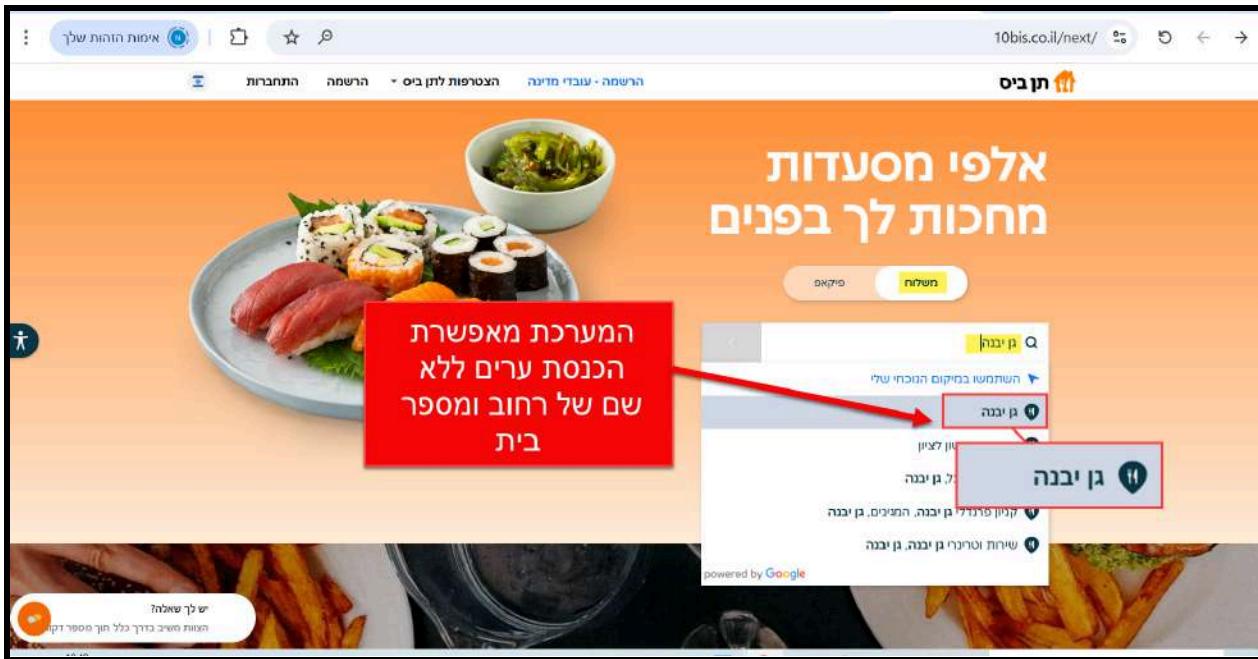

1. Navigate to the delivery address search bar.
2. Type " Gan Yavne " in the search field without specifying a street or house number.
3. Select " Gan Yavne " from the suggestions and click " הוסףה ".
4. Repeat the process with a different city (e.g., " Ashdod ") (אשדוד).

#### Actual Result:

The validation is inconsistent. For some locations like "Gan Yavne," the system allows proceeding with an incomplete address, while for others it correctly requires full address details.

#### Expected Result:

The system should consistently block all incomplete addresses and display the error message: "מצטערם אבל חסר לנו רחוב ומספר בית".

### Description

#### Steps to Reproduce:

1. Login to a valid account.
2. Choose a valid address.
3. Navigate to the ad for new restaurants in the ad banner.
4. Click on the ad banner for 'New Restaurants / Flavors'.

#### Actual Result:

Nothing happens when you click the ad for new restaurants. It does not bring you to a page with new restaurants, nor does it filter the list by new restaurants.

#### Expected Result:

Clicking the ad for new restaurants should either bring you to a page with new restaurants, or filter the list with only new restaurants.

The screenshot shows a search results page for restaurants on the 10bis.co.il website. At the top, there are filters for 'משלוח' (Delivery) and 'סינון וטזין' (Sanctioned and Fresh), with the latter highlighted by a red arrow. Below this, several restaurant cards are displayed in a grid format. Each card includes a photo of the food, the restaurant's name, its rating (e.g., 4.1★, 4.4★, 4.2★), and delivery details (e.g., 60-60 min, 40-40 min). A large red callout box at the top right contains the Hebrew text: 'עוד דוגמא לכך שהסינון לפי דירוג נמור לא עובד כמו שצרכיר.' (Another example of how the sanitation according to rating is lower than expected).

#### Expected Result:

There should be a pop-up message (similar to the one when selecting the checkbox for emails for updates and discounts) confirming that you signed up for the service of getting emails for feedback after order.

The image consists of two screenshots of the 10bis.co.il website, both featuring Hebrew text.

**Screenshot 1: Account Settings**

The URL in the address bar is [www.10bis.co.il/next/restaurants/search/](http://www.10bis.co.il/next/restaurants/search/). The page shows a navigation bar with a flag icon, the text "היום,نعم", and a dropdown menu "הזמנה חוזרת". A large red arrow points from the top right towards the "אזרור אישי" (Personal Area) link. Below the navigation, there's a "גיאוגרפיה" (Geography) section with a map icon and a "צ'אט עם נציג שירות" (Chat with Service Representative) section with a "צ'אט" (Chat) button.

**Screenshot 2: Reminders**

The URL in the address bar is [www.10bis.co.il/next/personal-area-section/settings](http://www.10bis.co.il/next/personal-area-section/settings). This screenshot shows a "הגדרות חשבון" (Account Settings) section. A red box highlights the "הגדלת חשבון" (Increase Account) button. To its left, a red box contains the text: "אין שם פידבק (חויבי או שלילי) כאשר מודיעים את הסימון לקבלת מיילים על אישור הזמנה." (There is no feedback (mandatory or negative) when you indicate to receive messages upon approval of the reservation.)

The screenshot shows a mobile application interface for 'Tun Bis'. At the top, there is a header bar with various icons and text in Hebrew. A red box highlights the 'התחברות' (Login) button. A large red arrow points from this button down to a login modal window. The modal has a title in Hebrew: 'זו ההזמנה הראשונה שלך. כבר יש לך חשבון?'. It contains fields for 'טלפון' (Phone number) and 'סיסמה' (Password), along with 'Forgot password?' and 'Create account?' links. Below these are social media login options for 'Google' and 'Facebook'. At the bottom of the modal, there is a link 'לאן לשולח את המזון?' (Where to send the food?). The background of the app shows a blurred image of a plate of sushi.
